

Fethi Ozdol

AWS Solutions Architect

🔗 thisismypattern.com

AWS Solutions Architect with 16 years cross-functional experience in software development and technology delivery across multiple industries.

📍 London, W2, UK

Work

BBC Studios

www.bbcstudios.com

AWS Solutions Architect for eCreation Media

Aug 2025 – Present

BBC Studios' new global digital media supply chain in AWS cloud.

- Cloud architecture design of the new global digital media supply chain's fulfilment system using AWS serverless stack
- System integration, software delivery lifecycle, security and observability for the work order management system
- Leading a multi-geographic development team of 4

Vehicularis

www.vehicularis.com

Co-Founder

Jan 2025 – Present

Vehicularis a startup that aims to transform the way vehicle owners interact with their vehicles through a secure, privacy-focused data and automation platform.

- Cloud architecture design, infrastructure-as-code and backend software development using AWS serverless stack
- Successful Alpha stage with 14 volunteering end users
- Member of AWS Activate, Microsoft for Startups and NVIDIA Inception programs

Convex Insurance

convexin.com

AWS Solutions Architect for Stellarmann

Oct 2024 – Dec 2024

Convex is an international specialty insurer and reinsurer.

- Cloud architecture and software solutions design for new features and performance improvements on the company's annual forecasting application

eCreation Media

www.ecreationmedia.tv

AWS Solutions Architect for DGH

Jan 2024 – Oct 2024

eCreation Media provides software solutions to top UK media industry companies. I worked with multiple clients as an AWS Architect to deliver media software in AWS cloud.

- Multi-award winning British broadcasting company: Modernising their media broadcasting platform by using AWS serverless stack to integrate their vendor provided media broadcasting software with other systems in AWS cloud
- UK top media data communication and transmission provider: Supervising new feature development on their linear and non-linear content interchange platform, which uses AWS Elemental Services including MediaConnect, MediaLive, and MediaPackage

Xecuta

www.xecuta.co.uk

Director & Chief Architect

Feb 2024 – Present

Xecuta aims to provide Software as a Service offerings for small-medium business' affordability. I act as the Chief Architect in the company during my off-contract working hours and I lead the company's SaaS products development.

- Built a SaaS called 'RPA Farm' from scratch in AWS Cloud. The service provides 24/7 service for 3 UK insurance companies
- Built a SaaS called 'Document Analysis Service' from scratch in AWS Cloud. The service provides 24/7 service for 1 non-UK small business

Synapx

www.synapx.co.uk

AWS Solutions Architect

Jun 2022 – Dec 2023

Chief Architect in the company's IT consultancy projects in AWS and Azure. I also took up short outside IR35 contract roles through Synapx Ltd.

- Built the company's device management, security and compliance system using Microsoft Azure AD, Microsoft Intune, Microsoft Defender, and Microsoft O365
- Google Chrome Browser Management using Google Workspace and Cloud Identity
- Defined company standards and naming conventions for the company's tech inventory and environment management

Accenture

www.accenture.com

Tech Arch Delivery Associate Manager

Jul 2019 – Jun 2022

AWS Solutions Architect and Cloud Engineer in Accenture AWS Business Group (AABG) UK and Ireland.

- Became AWS Certified Solutions Architect – Associate
- Became AWS Certified Cloud Practitioner
- Most Innovative Team in UK to participate at Accenture's Global V360 Awards 2020

Accenture

www.accenture.com

Advanced Application Engineering Specialist

Sep 2015 – Jun 2019

Team Lead in DevOps UK and Ireland group.

- Became Google Cloud Certified Professional Cloud Architect
- Obtained Technology Architect Associate in Accenture MTA programme

Garanti BBVA

www.garantibbva.com.tr

Development Architecture Specialist

Jan 2014 – Aug 2015

Responsible for development standards, environments, and tooling for millions of lines of code in Java, C#, COBOL, PL/I.

Garanti BBVA

www.garantibbva.com.tr

Senior Software Engineer

Nov 2009 – Apr 2013

Full stack developer for CRM, Sales, and Marketing modules for 6 million active retail and commercial banking customers.

Educations

Sabanci University, Türkiye

www.sabanciuniv.edu/en

Bachelor of Science, Computer Science and Engineering

Sep 2004 – Feb 2009

Projects

Media Broadcasting Platform | eCreation Media Technology

Jun 2024 – Aug 2024

Modernising a client's media broadcasting platform using AWS Serverless stack and vendor provided media broadcasting software.

Amazon API Gateway Lambda TypeScript Amazon SQS Amazon S3 Amazon EventBridge
Bitbucket

Media Content Interchange Platform | eCreation Media Technology

Jan 2024 – May 2024

Supervising new feature development and providing cloud architecture design for the client's linear and non-linear content interchange platform.

Amazon CloudFront Amazon API Gateway Lambda Python Amazon EventBridge
Amazon SQS Amazon S3 GitHub Actions Terraform MediaConnect MediaLive
MediaPackage MediaStore

RPA Farm | Xecuta

rpafarm.com

Feb 2024 – Present

RPA Farm is a software as a service (SaaS) that provides Robotic Process Automation (RPA) as a service (RPAaaS) with pay-per-use pricing model at 1 millisecond granularity. The service is built as fully serverless on AWS cloud and can execute Robot Framework scripts that can be self-managed or Xecuta-managed. It provides APIs for single or multiple task execution on demand. As Chief Architect, I designed and implemented its cloud architecture, built its delivery lifecycle and DevOps processes, and wrote backend code in Node.js and Python.

Amazon DynamoDB Amazon SQS Amazon EventBridge Amazon Cognito Amazon CloudWatch
Terraform Azure DevOps SonarCloud checkov.io

Document Analysis Service | Xecuta

www.xecuta.co.uk

Feb 2024 – Present

Document Analysis Service is a software as a service (SaaS) that can extract text from documents and images. Unlike its counterparts, it aims to be the most cost-effective service on the market thanks to its pay-per-use pricing model at 1 page granularity. The service is built as fully serverless on AWS cloud and it can integrate with Amazon Textract or Google Cloud DocumentAI for complex use cases that require Machine Learning or Generative AI. It provides APIs for single or multiple page processing on demand. As Chief Architect, I designed and implemented its cloud architecture, built its delivery lifecycle and DevOps processes, and wrote backend code in Node.js and Python.

Amazon Textract Google Cloud DocumentAI

Public Health | Accenture

www.accenture.com

Jun 2021 – Oct 2021

As Platform Engineering Lead, managed a cloud engineering team of 5 and coordinated 10s of releases and provided 24/7 BAU support for supplying COVID-19 tests to care homes.
